Data Analyst with 1 year of experience in SQL, Python, Excel, and Power BI, specializing in business intelligence, KPI reporting, and predictive analytics. Proven ability to build dashboards, automate data workflows, and deliver actionable insights for manufacturing and AI-driven environments. Certified in Anthropic AI, IBM Spark, and Databricks.

Technical Skills

Python | R | SQL | MySQL | PostgreSQL | Excel (Advanced) | Power BI | Zoho Analytics | SAP | DAX | Statistics | Data Visualization | Digital Marketing | Canva | Git | Pandas | NumPy | Statistical Analysis | Data Cleaning | Forecasting

Soft Skills: Problem-Solving | Adaptability | Team Collaboration | Documentation Reports & Presentations

Work Experience

RGK Group of Industries

Data Analyst

Feb 2026 - Present

Rajkot, Gujarat (India)

- Analyzing business, production, and sales data using SQL, Excel, and Python to generate actionable insights for senior management decision-making.
- Designing interactive dashboards and automated KPI reports to track performance, identify trends, and improve operational efficiency.
- Performing SAP data reconciliation and procurement tracking across departments to ensure data accuracy.
- Developed a predictive AI tool using sensor data to forecast machine downtime and failure, enabling proactive maintenance decisions and reducing unplanned production disruptions.

Wildrex Solutions

AI Engineer Intern

July 2025 – Oct 2025

Ahilyanagar, Maharashtra (India)

- Built an OCR-based intelligent document processing system for Ahilyanagar Police Department, reducing manual document routing time by 60% and automating SP-level correspondence suggestions across departments.
- Developed WildNetra an AI-powered wildlife surveillance system using computer vision and object detection, improving leopard threat detection accuracy by 40% for real-time forest monitoring.
- Created an Android application with an integrated LLM-based AI chatbot, reducing manual query handling by 50% through conversational automation.

Project Work

WildNetra - Wildlife Surveillance AI System

Sep 2025

- Developed an AI-powered wildlife surveillance system using computer vision and object detection models, improving leopard threat detection accuracy by 40% for real-time forest monitoring.
- Technologies: Python | YOLOv8 | Computer Vision | Object Detection | AI/ML.

Sales Performance & Profitability Dashboard

Nov 2025

- Analyzed 10,000+ sales records using Excel and Power BI to identify trends and profit drivers.
- Built Power BI dashboard with KPIs, regional analysis, and customer insights.
- Automated monthly reporting and identified loss-making categories.

Education

• **Savitribai Phule Pune University** | Matoshri College of Engineering, Nashik (Maharashtra)

July 2022 - Jun 2025

Bachelor of Engineering in Artificial Intelligence & Data Science

CGPA : 8.08/10

• **Maharashtra State Board Technical Education** | MIT Polytechnic, Yeola (Maharashtra)

July 2019 - Jun 2022

Diploma in Computer Engineering

Percentage : 82.17%

Certifications - AI Fluency: Framework & Foundations - Anthropic | Spark Fundamentals I - IBM |

Databricks Fundamentals Accreditation - Databricks
